Darwin was the first to visualize biological data in tree format. His tree is the only figure in Origin of Species. He invented the evolutionary dendogram.

Fed up with line graphs and pie charts? There are other ways to present your data!

Trees and network diagrams have been around for a lot longer than we think. They continue to describe the sciences and interface with the arts.

**Manuel Lima**

**Thursday Sept 18th**

at

6:00 – 7:00 PM

Jewell and Stanley Glasgow Hall, School of Architecture, University of Miami.

Part of the Places and Spaces Exhibit Seminar Series
